

João Victor Wanderley Ramos

portfolio.jvictor.com.br • [Linkedin](#) • [GitHub](#) • [YouTube](#)

Fullstack JavaScript developer with front-end emphasis. Currently building web/mobile apps with React and Google Apps Scripts. For the past six years had worked for brazilian Ministry of Economy as an IT Analyst. Passionate about learning and helping others. It is always a pleasure to publish video guided tutorials on YouTube. I love chatbots: it is a powerful tool to help everyone in all kinds of tasks.

#Skills

Application & Data

JavaScript • HTML
CSS • TypeScript
React Native • Expo
Axios • Angular
ExpressJS • Knex.js
JSON Server • Sqlite

Libraries/APIs

Twitter API
Telegram Bots
BsportsFan API
Mailthis.to
Betfair Exchange

Infrastructure

Node.js • Ubuntu
PM2 • NGINX
Windows 10 • Git
Google Apps Script
DigitalOcean • Vim
NPM • Certbot SSL
Putty • GitHub

Utilities

Android Studio
Stackoverflow
Stackblitz
VScode
Insomina
Notepad++
Codepen

Business

Discord
Google Meet
Google Drive
Gmail
Telegram
Google Sheets

Other: Native Portuguese • Advanced English • Patience/Positivity • Audio and Video editing

#Projects (see [portfolio](#) for more)

Most of them are running on the Google Apps Script platform in the cloud. Some required APIs development.

Medicine Reminder - A very useful chatbot that reminds you when it is time to take that pill.

TremdGol - A powerful mobile app that provides you a lot of statistics about live soccer events.

Finance Logger - A chatbot that tracks your expenses and summarizes it at the end of the month.

Soccer scanner bot - A scanner robot that follows live soccer events statistics and places automatic betting orders on [Betfair Sports Exchange](#) when predefined criterias are matched.

PortfolioBot - A simple chatbot that generates a PDF portfolio report from your text messages.

João te ajuda - A [youtube channel](#) where I create videos to help people learn how to do things such as coding. Or how not to do it, like in [this one](#). It is also possible to see me playing guitar there.

#Experience

1. IT Analyst at [Ministry of Economy](#) - Federal Government of Brazil [2014 - present]

Working on a variety of projects. Capable to build Business Intelligence solutions from scratch using Pentaho suite for ETL data process and Power BI/Qlik Sense for dashboards. Currently in full transition to software development. IT hardware and software contracts specifications are always one of others activities conducted here. Besides that, I am also responsible for inspecting these technology contracts and for the financial control related to it at the Ministry Of Economy IT Department.

2. **Aeronautical Information Service (AIS) Specialist** - [INFRAERO](#) (Brazilian Government Corporation) [2011-2013] Supported pilots and ground air-traffic controllers of international civil aviation, ensuring the flow of information necessary for the safety, regularity, and efficiency of air navigation.

#Education

1. **Bachelor's degree in Computer Science** - Federal University of Pernambuco - Recife, Pernambuco, Brazil [2007 - 2012]

#Interests
