João Victor Ramos

Full Stack JavaScript Developer - React, Google Apps Script

Linkedin • GitHub

portfolio.jvictor.com.br • YouTube

Currently building web/mobile apps. For the past six years had worked for brazilian Ministry of Economy as an IT Analyst. Passionate about learning and helping others. It is always a pleasure to publish video guided tutorials on YouTube. Also, I love chatbots: it is a powerful tool to help everyone in all kinds of tasks.

#Skills

Application & Data	Libraries/APIs	Infrastructure	Utilities	Business
JavaScript • HTML	Twitter API	Node.js • Ubuntu	Android Studio	Discord
CSS • TypeScript	Telegram Bots	PM2 • NGINX	Stackoverflow	Google Meet

JSON Server • Sqlite		NPM • Certbot SSL	Notepadd++	Google Sheets
		Putty • GitHub	Codepen	

Other: Native Portuguese • Advanced English • Patience/Positivity • Audio and Video editing

#Projects

Most of them running on the Google Apps Script platform in the cloud. Some required APIs development while others consume third party APIs as data sources. See portfolio for more.

Medicine Reminder - A very useful chatbot that reminds you when it is time to take that pill.

TremdGol - A powerful mobile app that provides you a lot of statistics about live soccer events.

Finance Logger - A chatbot that tracks your expenses and summarizes it at the end of the month.

Soccer scanner bot - A scanner robot that follows live soccer events statistics and places automatic betting orders on Betfair Sports Exchange when predefined criterias are matched.

PortfolioBot - A simple chatbot that generates a PDF portfolio report from your text messages.

João te ajuda - A youtube channel where I create videos to help people learn how to do things such as coding. Or how not to do it, like in this one. It is also possible to see me playing guitar there.

#Experience

1.   **IT Analyst at Ministry of Economy - Federal Government of Brazil [April 2014 - present]**
Working on a variety of projects. Capable to build Business Intelligence solutions from scratch using Pentaho suite for ETL data process and Power BI/Qlik Sense for dashboards. Currently in full transition to software development. IT hardware and software contracts specifications are always one of others activities conducted here. Besides that, I am also responsible for inspecting these technology contracts and for the financial control related to it at the Ministry Of Economy IT Department.

2.   **Aeronautical Information Service (AIS) Specialist - INFRAERO (Brazilian Government Corporation) [February 2011 - April 2013]** Supported pilots and ground air-traffic controllers of international civil aviation, ensuring the flow of information necessary for the safety, regularity, and efficiency of air navigation.

#Education

1.   **Bachelor's degree in Computer Science** - Federal University of Pernambuco - Recife, Pernambuco, Brazil [2007 - 2012]
